Offers

Ascom IP-DECT

Compliant with: Avaya Aura® Platform, Avaya IP Office Platform

Ascom IP-DECT is an advanced mobile technology that combines the proven DECT standard with innovative VoIP, allowing organizations to take advantage of high quality voice and data on the same network. The IP-DECT system can be tailored to an organization's requirements regardless of size, or number of locations, and it can be seamlessly incorporated into any existing system.

The wide range of Ascom state-of-the-art handsets can meet the needs and requirements of any user, ranging from entry-level office handsets to purpose built healthcare application handsets and robust handsets for industrial usage. Support for wideband audio, positioning, and push-to-talk features transform the handsets into powerful work tools.

Easy to install, manage, and update, the Ascom IP DECT system centralizes all communications for quick and easy access, helping reduce the stress and additional administrative burden caused by managing different information streams.

Ascom i63

Compliant with: Avaya Aura Platform, Avaya IP Office Platform

The Ascom i63 VoWiFi handset is based on Wi-Fi technology, offering a high class telephony, messaging, and alarm solution for enterprise businesses. The handset adds mobility to existing IP PBXs, whilst leveraging the existing IP network and Wi-Fi infrastructure. The Ascom i63 integrates to Avaya call servers via SIP, delivering a feature-rich wireless telephony solution. The web-based centralized management system offers over-the-air updates to help reduce administrator workload. In addition, centrally stored settings help simplify phone replacement and shared handset scenarios, which can increase value as well as provide continuity and peace of mind for administrators and users.

Ascom Myco 3 & Ascom Myco 3 DECT

Compliant with: Avaya Aura Platform, Avaya IP Office Platform

Ascom Myco is a truly purpose-built smartphone inspired by nurses. Its design is based on a deep understanding of the on-the-job reality and methods of working nurses and clinicians, as well as the demanding healthcare environment. The Ascom Myco incorporates enterprise-grade VoWiFi telephony, secure messaging, and provides access to clinical information at the point of care. Its unique top-display with integrated priority beacon provides a smart hands-free, at-a-glance alert notification system. Ascom Myco is encased in a durable and drop-resistant shell with a wearable clip that securely fastens the handset to prevent dropping. It combines several separate tools, like barcode scanner, NFC usage, and positioning, into one powerful work tool that has been carefully designed to help make every shift more pleasant, efficient, and rewarding.

About DevConnect

DevConnect is Avaya's developer and technology partner program, part of the Avaya Experience Builders network of Avaya experts, partners, developers, and customers. This unique global collaborative is exceptionally positioned to deliver the next-gen customer and employee experiences that businesses need through the Avaya OneCloud AI-Powered Experience platform. Membership in the DevConnect program offers access to a wide range of developer resources including documentation APIs and SDKs. Technical support, as well as compliance testing and co-marketing benefits are available to enhanced level members. To learn more or register for membership, visit www.devconnectprogram.com.
