

Avaya Solution & Interoperability Test Lab

Application Notes for CallTouch from Northgate Public Services UK Limited with Avaya Aura® Contact Centre R6.4 and Avaya Communication Server 1000 R7.6 – Issue 1.0

Abstract

These Application Notes describe the configuration steps for provisioning CallTouch from Northgate Public Services UK Limited with Avaya Aura® Contact Centre R6.4 and Avaya Communication Server 1000 R7.6.

Readers should pay particular attention to the scope of testing as outlined in Section 2.1, as well as observations noted in Section 2.2 to ensure that their own use cases are adequately covered by this scope and results.

Information in these Application Notes has been obtained through DevConnect compliance testing and additional technical discussions. Testing was conducted via the DevConnect Program at the Avaya Solution and Interoperability Test Lab.

1. Introduction

These Application Notes describe the configuration steps for provisioning CallTouch from Northgate Public Services UK Limited with Avaya Aura® Contact Centre R6.4 connecting to the Application Module Link (AML) on the Avaya Communication Server 1000 R7.6.

CallTouch is an Open Communications Platform capable of simultaneously controlling all available communication mediums. Through this single platform a wide range of applications may be facilitated including Integrated Communication Control System (ICCS), Call Handling, Mobile Data, Locating, Callout and Directories.

The CallTouch Agent desktop achieves desktop softphone CTI via server side integration. There are multiple server side adapters for connecting to multiple telephony platforms. CallTouch is a server based, thin client, multi-channel contact centre and agent desktop that provides call control and monitoring functionality to end users via the .net interface on the Communication Control Toolkit (CCT) module of Avaya Aura® Contact Centre.

2. General Test Approach and Test Results

The interoperability compliance testing focused on verifying CallTouch Agent desktop handling of CTI messages in the areas of call control, event notification and routing.

DevConnect Compliance Testing is conducted jointly by Avaya and DevConnect members. The jointly-defined test plan focuses on exercising APIs and/or standards-based interfaces pertinent to the interoperability of the tested products and their functionalities. DevConnect Compliance Testing is not intended to substitute full product performance or feature testing performed by DevConnect members, nor is it to be construed as an endorsement by Avaya of the suitability or completeness of a DevConnect member's solution.

2.1. Interoperability Compliance Testing

The interoperability compliance testing focuses on various technical testing scenarios to verify CallTouch with Avaya Aura® Contact Centre. In addition, serviceability tests were also performed to assess the reliability and accuracy of the joint solution. The testing focused on the following types of calls:

- Login/Logout operators using CallTouch
- Basic Inbound/Outbound Calls
- Hold Functionality
- Ready/Not Ready Reason Code Selection
- Voicemail and DTMF test
- Serviceability testing

2.2. Test Results

All Test Cases passed successfully. The following observations were noted:

- CallTouch does not support a “Blind” or “Unsupervised” transfer.
- The Northgate CallTouch servers being present were not an integral part of this compliance testing. If they were not installed the testing could still be carried out. Each client has its own relationship with the Contact Center.
- The Client workstations recover from a LAN failure automatically and do not need any manual intervention.
- The Agents must be setup correctly on Contact Center as non-CCT users as outlined in the Application Notes.

2.3. Support

Support from Avaya is available by visiting the website <http://support.avaya.com> and a list of product documentation can be found in **Section 10** of these Application Notes. Technical support for the CallTouch product can be obtained as follows.

- Tel : +44 (0)8450705577
- Web : <https://www.northgateps.com/contact-us/>

3. Reference Configuration

The configuration in **Figure 1** shows the setup for compliance testing. The Northgate solution was connected to the Avaya solution, consisting of a CS1000 and a Contact Centre installed connecting via AML to the CS1000, on the same LAN. The .net interface on the Contact Centre provides CTI capability. An agent running the CallTouch Agent Desktop software from a browser is used to answer/make the calls in a call center environment.

Note: The CS1000 and Contact Center share an isolated LAN called and Embedded Lan or E-LAN.

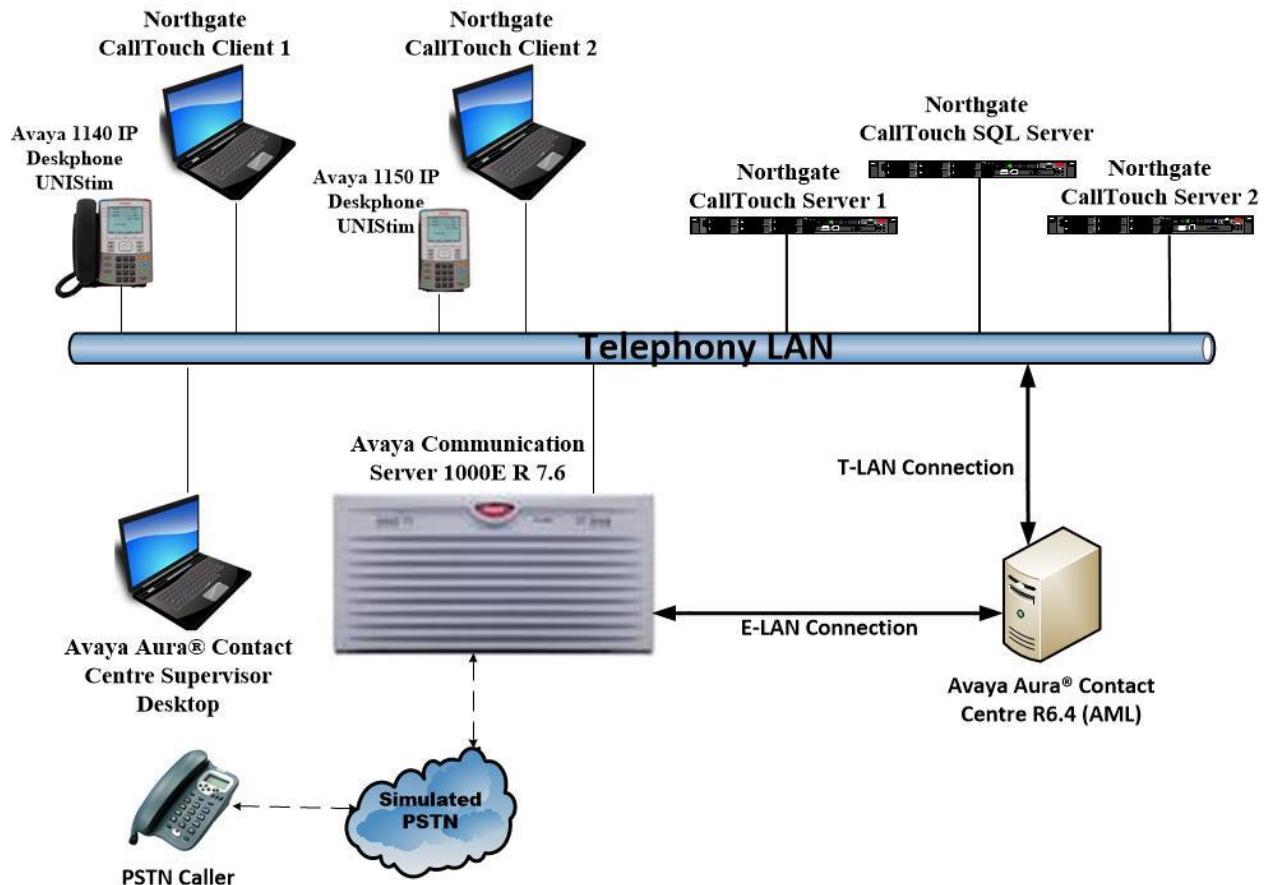

Figure 1: Connection of Northgate CallTouch with Avaya Aura® Contact Centre R6.4 and Avaya Communication Server 1000 R7.6

4. Equipment and Software Validated

The following equipment and software was used for the compliance test.

Equipment/Software	Release/Version
Avaya Communication Server 1000 running on CPPM	R7.6 (See Appendix A for a full list of Patches)
Avaya Aura® Contact Centre running on a Virtual Platform	R6.4 SP16 (See Appendix C for a full list of Patches)
Avaya 1140E IP UNIStim Deskphone	0625C8Q
Avaya 1150E IP UNIStim Deskphone	0627C8Q
Northgate CallTouch Server	125a.6.65.9.37
Northgate CallTouch Workstation	265.231.57.5.28

5. Configure Avaya Communication Server 1000

It is assumed that a fully functioning CS1000 is in place with the necessary licensing and with an E-LAN connection in place to the Contact Centre. For further information on the configuration of the CS1000 please see **Section 10** of these Application Notes. A telnet application such as PuTTY is used to administer the CS1000. Open an SSH session to the Node IP address of the CS1000, login to the CS1000 Linux application using the appropriate credentials and type **cslogin** (not shown) to gain access to the PBX command line interface.

Note: A simulated PSTN connection was present on the CS1000 in the form of a QSIG ISDN connection, the configuration of which is outside the scope of these Application Notes.

5.1. Configuration of Agent Deskphone for CTI

There is no specific setup required to allow CallTouch to take control of the set other than ensuring Associate Set Assignment (**AST**) is set for the ACD (Key 0) and the SCR (Private DN). In order to add or make a change to a set, enter overlay 20 by typing **LD 20** at the > prompt. Note the full printout of a programmed set that was used to test is included in the **Appendix B** of these Application Notes.

Prompt	Response	Description
>	LD 20	Enter Overlay 20
REQ	chg	change
TYPE	1140	Type of phone set
TN	96 0 0 6	Loop Shelf Card unit of the telephone
AST	00 03	Allow CTI for keys 00 and 03
Return to end		

5.2. Add a new Control Directory Number (CDN)

In order to route calls to agents a **CDN** must be created on the CS1000. Enter overlay 23 in order to create a CDN. Type **LD 23** at the > prompt in order to enter the overlay.

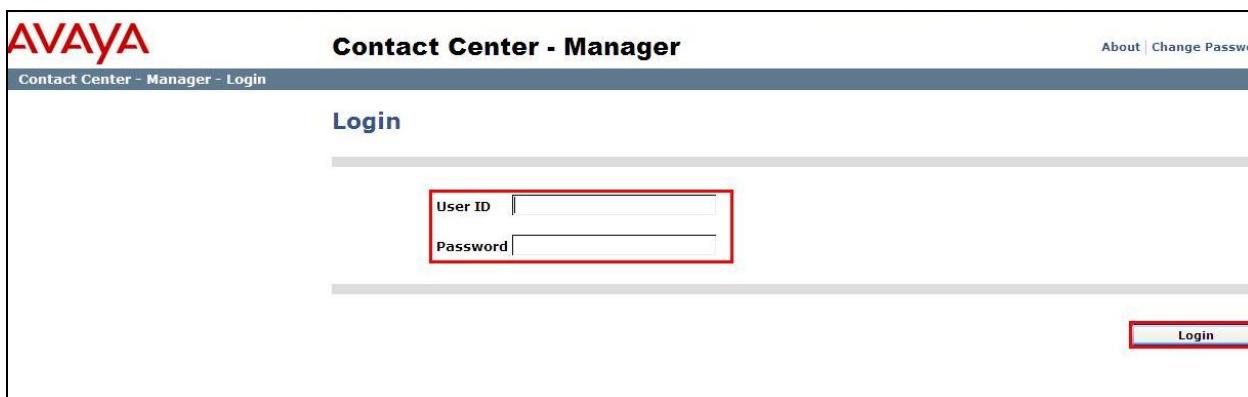

Prompt	Response	Description
>	LD 23	Enter Overlay 23
REQ	new	Add and new
TYPE	CDN	Control Directory Number
CUST	0	Customer Number 0
CDN	6100	CDN number 6100
Return to....		
DFDN	6666	Default ACD DN (this is the ACDQ printed in Appendix B)
Return to end		

6. Configuration of Avaya Aura® Contact Centre

It is assumed that a fully functioning Contact Centre is already in operation and these Application Notes do not go through the setup of the Contact Centre from the beginning rather what steps are required in order to ensure that CallTouch can login and take control of phone sets. For more information on the setup and configuration of Contact Centre please refer to **Section 10** of these Application Notes.

Note: A printout of the patch list is available in **Appendix C**.

Log into the Contact Centre by opening a web session to the Contact Centre sever and enter the proper credentials and click on the **Login** button.

The screenshot shows the Avaya Contact Center - Manager login interface. At the top, there's a header bar with the Avaya logo and navigation links for 'About' and 'Change Password'. Below the header is a sub-header 'Contact Center - Manager - Login'. The main area is titled 'Login'. It contains two input fields: 'User ID' and 'Password', both of which are highlighted with a red border. At the bottom right of the form is a 'Login' button, also highlighted with a red border.

6.1. Contact Centre Configuration

Select **Configuration** as highlighted below.

The screenshot shows the Avaya Contact Center - Manager Launchpad interface. At the top, there's a header bar with the Avaya logo and navigation links for 'About' and 'Audit Trail'. Below the header is a sub-header 'Launchpad'. The main area is titled 'Launchpad' and lists several management modules: 'Contact Center Management', 'Access and Partition Management', 'Real-Time Reporting', 'Historical Reporting', 'Call Recording and Quality Monitoring', 'Configuration', 'Scripting', 'Emergency Help', 'Outbound', and 'Multimedia'. The 'Configuration' module is highlighted with a red border.

A CDN for emergency calls should be added in order to route the emergency calls to the agents. To add a CDN to the Contact Centre click on **CDN's (Route Points)** in the left window and enter the CDN details in the right window and ensure that **Acquired?** is ticked. Note this will be the same CDN as was created in **Section 5.2** above.

The screenshot shows the AVAYA Configuration interface. The left sidebar lists various system components under the main node 'AACC63VMPG'. A red box highlights the 'CDNs (Route Points)' item. The right pane displays a table titled 'CDNs (Route Points)'. The table has columns for Name, Number, Call Type, Acquired?, and Status. All entries show 'Local' as the call type and 'Acquired' as the status, with a checkmark in the 'Acquired?' column. The table includes a header row and several data rows, ending with a footer row marked with an asterisk (*).

Name	Number	Call Type	Acquired?	Status
North6100	6100	Local	<input checked="" type="checkbox"/>	Acquired
North6101	6101	Local	<input checked="" type="checkbox"/>	Acquired
North6102	6102	Local	<input checked="" type="checkbox"/>	Acquired
North6103	6103	Local	<input checked="" type="checkbox"/>	Acquired
North6104	6104	Local	<input checked="" type="checkbox"/>	Acquired
*			<input type="checkbox"/>	

In order to route the emergency calls to the agents, emergency skillsets must be added. Click on **Skillsets** in the left window and enter the information for the skillset in the right window.

The screenshot shows the AVAYA Configuration interface. The left sidebar lists various system components under the main node 'AACC63VMPG'. A red box highlights the 'Skillsets' item. The right pane displays a table titled 'Skillsets'. The table has columns for Contact Type, Prefix, Skillset Name, Default Activity Code, Threshold Class, and Call Age Preference. The 'Contact Type' dropdown is set to 'Voice_Mail'. The 'Skillset Name' column contains entries like 'Default_Skillset', '00_Skillset_Default_Activity_Code', and 'Skillset_Template'. The 'Default Activity Code' column contains entries like '00_Skillset_Default_Activity_Code'. The 'Threshold Class' and 'Call Age Preference' columns both show 'First In Queue'. The table includes a header row and several data rows, ending with a footer row marked with an asterisk (*).

Contact Type	Prefix	Skillset Name	Default Activity Code	Threshold Class	Call Age Preference
Voice_Mail	VM_	Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
SMS	SM_	Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
Fax	FX_	Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
Scanned_Document	SD_	Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
OpenQ	OQ_	Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
Predictive_Outbound	PR_	Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
Outbound	OB_	Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
vWeb_Communications	vWC_	Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
EMail	EM_	Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
Voice		Default_Skillset	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
Voice		EmergOpp	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
Voice		Non_EmergOpp	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
Voice		Admin1	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
Voice		Public	00_Skillset_Default_Activity_Code	Skillset_Template	First In Queue
*					

A Call Presentation Class is required for the Emergency Agents. To add a new Call Presentation Class click on **Call Presentation Classes** in the left window and add the call presentation class details in the right window ensure that **Call Force Delay** is selected for the **Presentation Option** and set the **Call Force Delay Timer** to 1.

The screenshot shows the AVAYA Configuration interface. The left sidebar shows a tree view with nodes like 'AACC63VMPG' (expanded to show 'Activity Codes', 'Call Presentation Classes', etc.), 'AACC63VMPG_CCT', and 'AACC63VMPG_CMM'. The main area is titled 'Configuration' and has a sub-section 'Call Presentation Classes'. A table lists several entries, one of which is highlighted with a red box. The table columns are: Name, Presentation Option, Call Force Delay Timer, Return To Queue After N Seconds, After Return to Queue, Make Phonaset, After Call, Break for N seconds, and Answer By Placing DN Call On Hold. The highlighted row has 'Emerg_Opp' in the Name column, 'Call Force Delay' in the Presentation Option column, '1' in the Call Force Delay Timer column, and 'N/A' in the other columns.

Name	Presentation Option	Call Force Delay Timer	Return To Queue After N Seconds	After Return to Queue, Make Phonaset	After Call, Break for N seconds	Answer By Placing DN Call On Hold
Call_Centre_Admin	Return To Queue	0	18	Not Ready	0	<input checked="" type="checkbox"/>
Non-Emerg_Opp	Let Call Ring	0	N/A	N/A	10	<input type="checkbox"/>
Emerg_Opp	Call Force Delay	1	N/A	N/A	5	<input type="checkbox"/>
Admin1	Call Force Delay	1	N/A	N/A	5	<input type="checkbox"/>
*						

Activity codes must be added to allow for the not ready reason codes to operate. Click on **Activity Codes** in the left window and add the required activity codes in the right window.

The screenshot shows the AVAYA Configuration interface. The left sidebar shows a tree view with nodes like 'AACC63VMPG' (expanded to show 'Activity Codes', 'Call Presentation Classes', etc.), 'AACC63VMPG_CCT', and 'AACC63VMPG_CMM'. The main area is titled 'Configuration' and has a sub-section 'Activity Codes'. A table lists activity codes, one of which is highlighted with a red box. The table columns are: Name, Number, and Display Name. The highlighted row has 'System_Default_Activity_Code' in the Name column, '0' in the Number column, and 'System_Default_Activity_Code' in the Display Name column.

Name	Number	Display Name
System_Default_Activity_Code	0	System_Default_Activity_Code
Skillset_Default_Activity_Code	00	Skillset_Default_Activity_Code
Not_Ready_Default_Reason_Code	000	Not_Ready_Default_Reason_Code
NotRdy_Pull_Mode_Default_Code	0000	NotRdy_Pull_Mode_Default_Code
Comfort_Break	003	Comfort Break
Training	006	Training
Administration	002	Administration
Other_Break	004	Other Break
Meeting	005	Meeting
Airwave_Call	007	Airwave Call
*		

Once the configuration details are entered, click on **Launchpad** at the top of the screen, (not shown), to get back to the start menu.

6.2. Contact Centre Agents

Select **Contact Centre Management** shown below. All the Agent details are configured in this section.

Enter a suitable name and login details for the new agent. Ensure that the Call Presentation is that which was created in **Section 6.1**.

The screenshot shows the "Contact Center Management" screen. The left sidebar lists "CCM Servers (Supervisors)" under "AAC663VMPG", including "Supervisor Default", "Supervisor PGTest", and several agents like "Agent1 TestCT", "Agent2 TestCT2", "Agent3 TestCT3", "Disp1 Test1", and "Disp2 Test2". The main panel displays "Agent Details: TestCT Agent1" and "Server: AAC663". The "User Details" section contains fields for First Name ("TestCT"), Last Name ("Agent1"), User Type ("Agent"), Login ID ("1111"), Personal DN (empty), ACD Queue ("6666"), and ACD Queue Error (a dropdown menu). The "Agent Information" section includes Primary Supervisor ("Supervisor PGTest"), Call Presentation ("Emerg_Opp"), Threshold ("Agent_Template"), and Tn Name (empty). The "Contact Types" section shows "Predictive_Outbound" selected in a dropdown. At the bottom are buttons for "Clear", "Submit", "Create New", and "Create Many".

Ensure that Voice is selected for the Contact Type and add the skillset created in **Section 6.1**. Click on **Submit** once all the details are entered correctly.

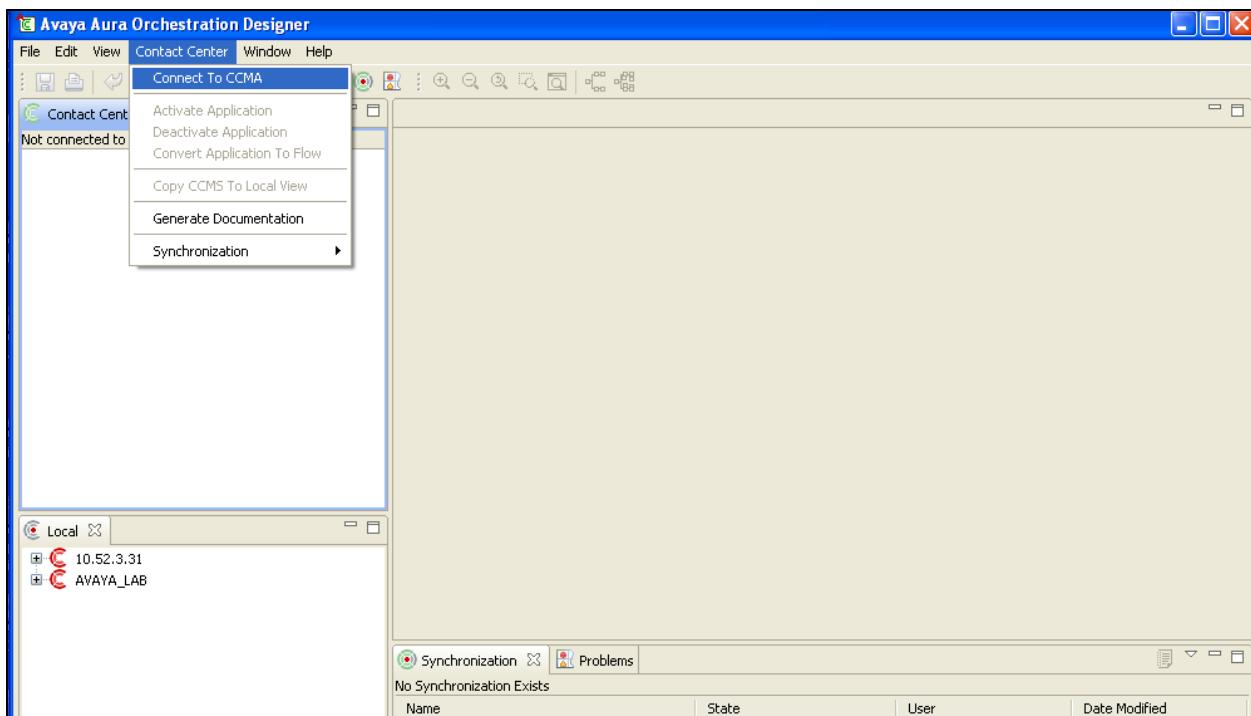

The screenshot shows the Avaya Contact Center Management software interface. The top navigation bar includes View/Edit, Add, Status, Launchpad, and Help. The left sidebar displays a tree structure under CCM Servers (Supervisors) for AACC63VMPG, showing Supervisor Default, Supervisor PGTest, Agent1 TestCT, Agent2 TestCT2, Agent3 TestCT3, Disp1 Test1, and Disp2 Test2. The main content area has two tabs: Contact Types and Skillsets. The Contact Types tab lists Predictive_Outbound, Scanned_Document, SMS, Voice (which is checked), Voice_Mail, and Web_Communications. The Skillsets tab lists Admin1, Default_Skillset, EmergOpp, and Public, all assigned to the Voice contact type with priority levels 2, 5, 1, and 3 respectively. Below the skillsets table is a link to Assign Skillsets. At the bottom of the page are buttons for Clear, Submit (highlighted with a red box), Create New, and Create Many.

6.3. Creating an Application for Emergency Routing

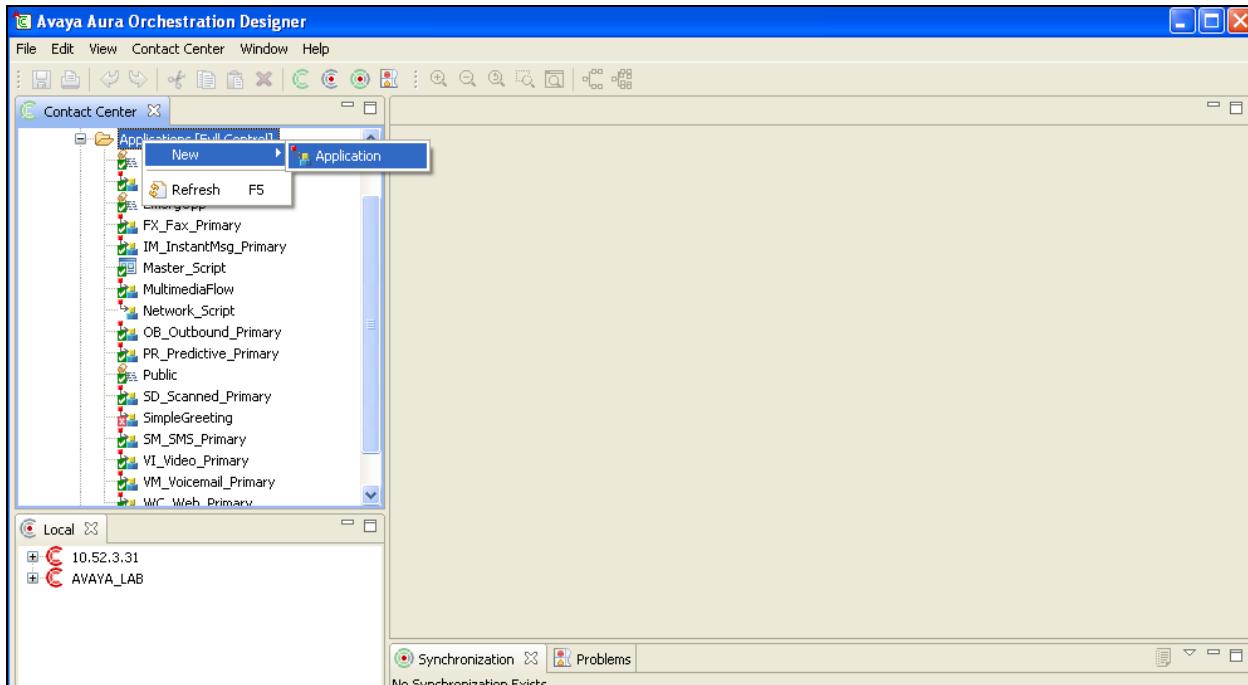

All routing changes are done using Orchestration Designer, this allows Applications or Scripts to be created and associated with a CDN or route point. The download and initial setup of Orchestration Designer is outside the scope of these Application Notes. For information on the setup and configuration of Orchestration Designer please refer to **Section 10** of these Application Notes.

A new application was created for the routing of emergency calls and this is associated with the CDN created on the CS1000 in **Section 5** above. Open Orchestration Designer (not shown) and **Connect to CCMA** as shown below.

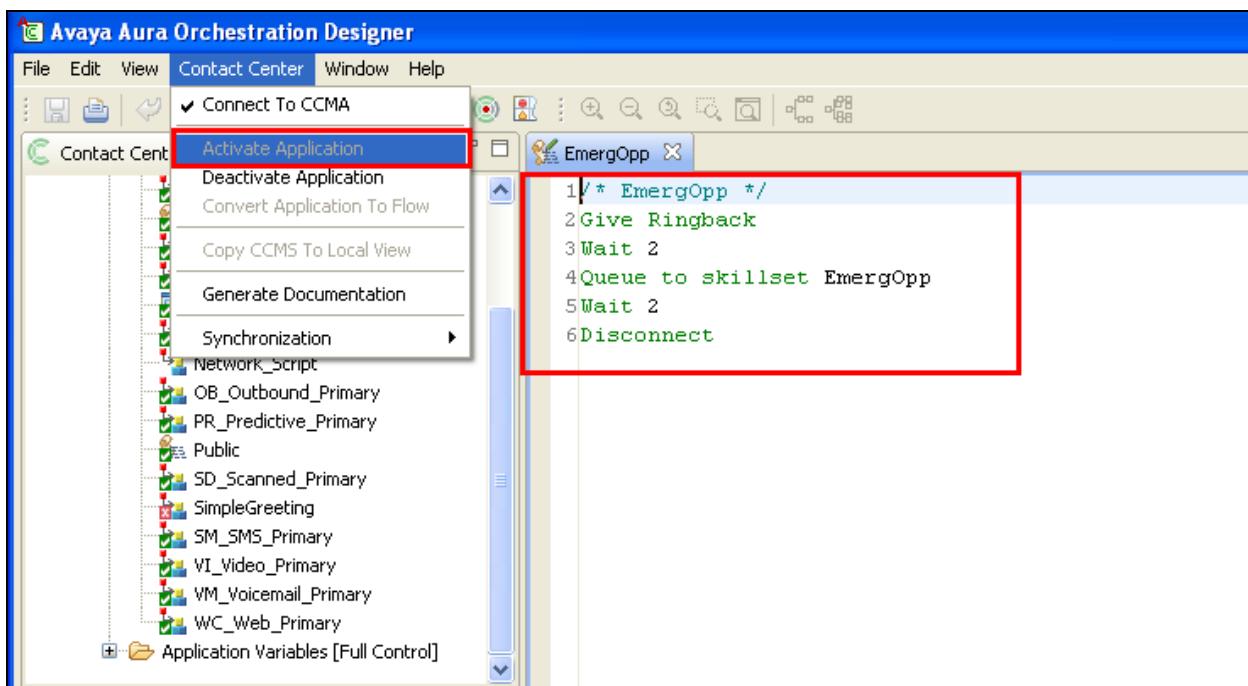

Note: CCMA stands for Contact Centre Manager Administration.

Navigate to **Applications** in the left window and right click and select **New→Application** as shown below.

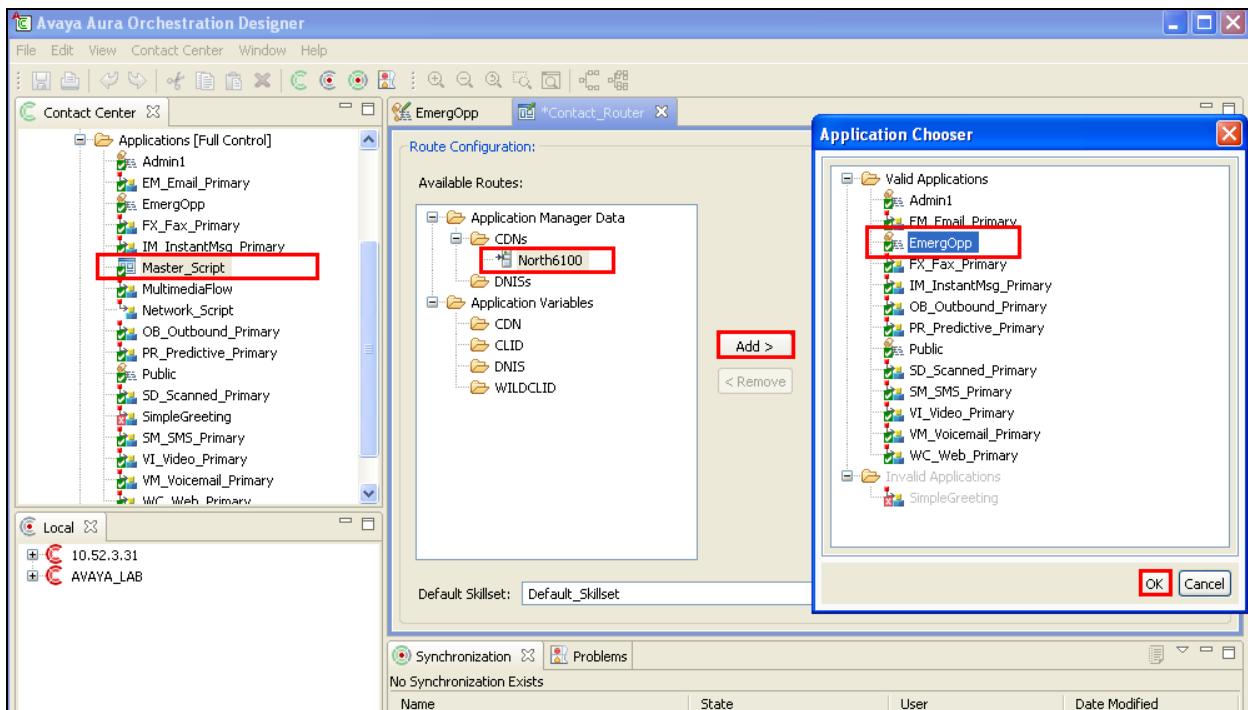

Below shows an example of a script used to route calls to a skillset. Once this is completed select **Contact Centre** and **Activate Application** as shown below in order to make this active.

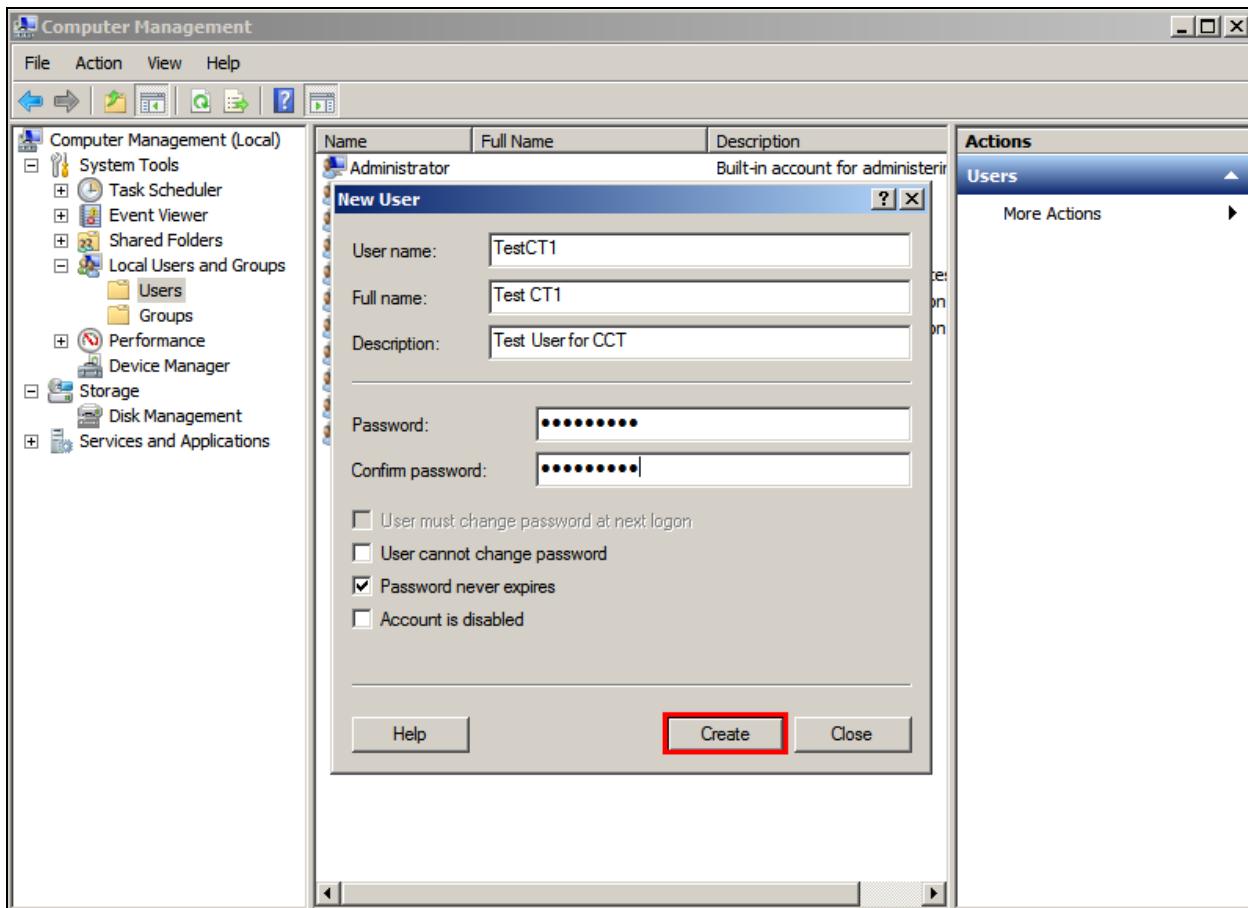

6.3.1. Associate an Application with a CDN

In order to associate an application with a CDN the master script must be opened as shown below. Double click on **Master_Script** in the left window. In the main window expand on **Application Manager Data → CDNs** select the required CDN and click on **Add** as shown below. Once this is selected a new window caller **Application Chooser** opens where the Application to be associated with this CDN is chosen as is shown below. Click on **OK** once this is done.

6.4. Configure CCT Users on the Contact Centre Server

Navigate to **Computer Management**, (not shown) and select **Users** from the left window and right-click and select **New User**. Enter a suitable user name and password for this new user. Click on **Create** once this user information is entered. Any user that will be created in CCT must also be added here.

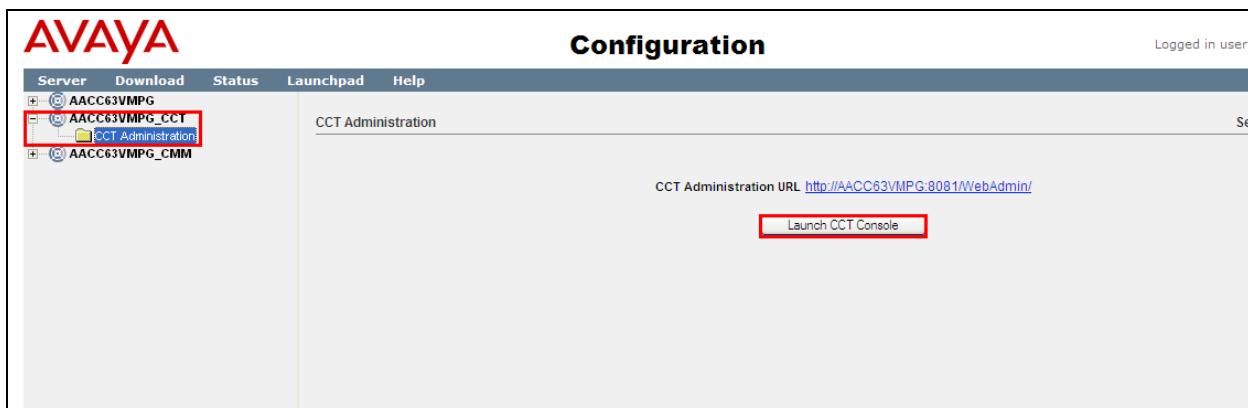

6.5. Configuring Communication Control Toolkit

It is assumed that the CS1000 information has already been imported into the Communication Control Toolkit (CCT) and thus is beyond the scope of these Application Notes. For further information on CCT and importing CS1000 information please refer to **Section 10** of these Application Notes.

In order to make changes in CCT navigate to configuration from **Launchpad** as shown below.

Once in configuration open the CCT server in the left window and click on **Launch CCT Console** in the right window.

6.5.1. Add CCT User

To add a new CCT User, right click on **Users** in the left window and select **Add new User**, as shown below.

The screenshot shows the AVAYA CCT Administration interface. On the left, there is a navigation tree with 'Users' selected, which has a sub-menu with 'View Details' and 'Add new User'. The main panel is titled 'CCT Users' and displays a table of users:

Login User Name	First Name	Last Name	Action
AACC63VMPG\testCT1	CT1	Agent1	[checkbox]
AACC63VMPG\testCT2	CT2	Agent2	[checkbox]
AACC63VMPG\wypadm	CADG	User	[checkbox]
AACC63VMPG\testCT3	CT3	Agent3	[checkbox]

Below the table, it says '4 CCT Users found, displaying 4 CCT Users. Page 1 / 1' and has a 'Delete' button.

Enter the user details note these should be the same as those configured in **Section 6.4**.

The screenshot shows the 'Update CCT User' dialog. The left sidebar has 'Users' selected. The main area has three tabs: 'User Details', 'Address Assignments', and 'Terminal Assignments'. The 'User Details' tab is active, showing fields for 'Login User Name' (AACC63VMPG\testCT1), 'First Name' (CT1), and 'Last Name' (Agent1). The 'Address Assignments' tab shows 'Available Resources' and 'Assigned Resources' sections. The 'Assigned Resources' section is highlighted with a red box and contains a table:

Passive	Terminal
[checkbox]	Line 96.0.0.4
[checkbox]	Line 96.0.0.5
[checkbox]	Line 96.0.0.6

6.5.2. Add Workstation

Right click on **Workstations** and select **Add new Workstation** as shown below.

The screenshot shows the AVAYA CCT Administration interface. On the left, there is a navigation sidebar with icons for Users, Workstations, Groups, and Providers. Under 'Workstations', the 'Add new Workstation' option is highlighted with a blue background. The main panel is titled 'Workstations' and displays a list of four workstations: ICCSX002, ICCSX001, paulglaptop, and ICCSNPAS01. Each entry has a small checkbox next to it. Below the list are navigation arrows and a message indicating 4 workstations found, with page 1 of 1. A 'Delete' button is also present.

Enter the name of the workstation to be added and click on **Save** once done.

The screenshot shows the AVAYA CCT Administration interface. The left sidebar is identical to the previous screenshot. The right panel is titled 'Update Workstation' and contains a form with a 'Workstation Name' field containing 'ICCSXA002'. Below the field is a red-bordered 'Save' button.

6.5.3. Associate a Workstation with a Terminal

In order to be able to use a particular terminal or phone set with a workstation this workstation must be associated with this line or terminal as shown below. Click on **Providers → Passive → Terminals** in the left window. Select a line or Terminal in the right window by double-clicking on the desired line/terminal.

The screenshot shows the AVAYA CCT Administration interface. On the left, there is a navigation tree with the following structure:

- Users
- Workstations
- Groups
- Providers (selected)
- Passive
 - Addresses
 - Terminals (selected)
 - IVRs

The main panel displays a table titled "Terminals" with the following data:

Name	Type	Enabled	Action
Line 96.0.0.4	AGENT	true	[checkbox]
Line 96.0.0.5	AGENT	true	[checkbox]
Line 96.0.0.6	AGENT	true	[checkbox]

Below the table, a message states "3 Terminals found, displaying 3 Terminals. Page 1 / 1". A "Delete" button is located at the bottom of the table area.

Once a line/terminal has been selected scroll down to **Workstation assignment**, add the workstation to be associated with that line or terminal. Click on **Save** once finished. This procedure must be repeated for each Terminal – Workstation assignment.

The screenshot shows the AVAYA CCT Administration interface with the "Workstation assignment" dialog open. The navigation tree on the left is identical to the previous screenshot.

The "Workstation assignment" dialog has two main sections:

- Available workstation:** A list of workstations that can be assigned. One item, "ICCSXA002", is highlighted with a red box.
- Assigned workstation:** A list of workstations that are currently assigned. One item, "ICCSXA001", is highlighted with a red box.

A message at the top of the dialog says: "A workstation is already assigned. No more can be assigned." Below the lists, the following counts are displayed:

- 12 Address found. Page 1 / 1
- 2 Address found. Page 1 / 1
- 4 Workstation found. Page 1 / 1
- 1 Workstation found. Page 1 / 1

At the bottom of the dialog, there is a "Save" button.

7. Configure Northgate Public Services CallTouch

All configuration of the CallTouch solution is done by the Northgate engineers and is therefore outside the scope of these Application Notes. For any information regarding the setup of the CallTouch solution please contact Northgate as outlined in **Section 2.3** of these Application Notes.

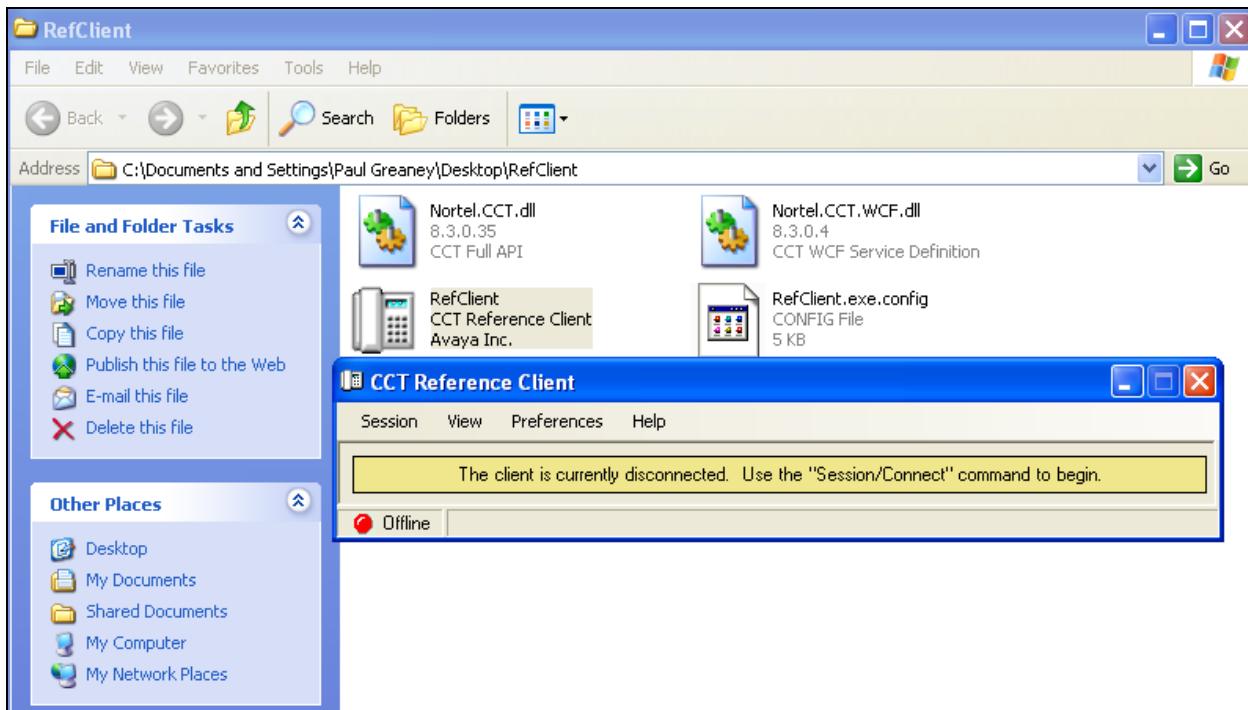

Note: An extract of the RuleOps file from CallTouch is contained in the **Appendix D** of these Application Notes.

8. Verification Steps

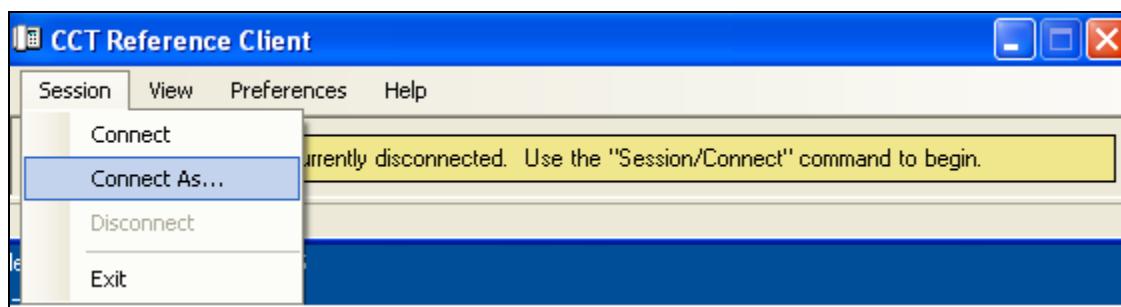

The following steps can be taken to ensure that the CallTouch has full call control over the desired phone sets.

8.1. Verify that Ref Client can be used to log in an agent

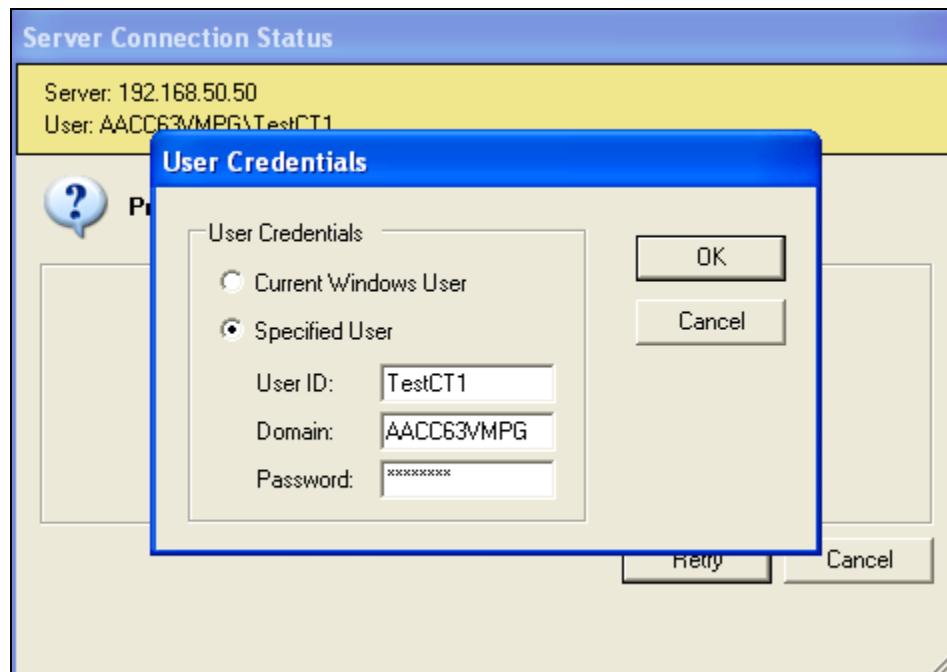

RefClient is a program used by Avaya to verify that full call control is available. Open RefClient as shown below.

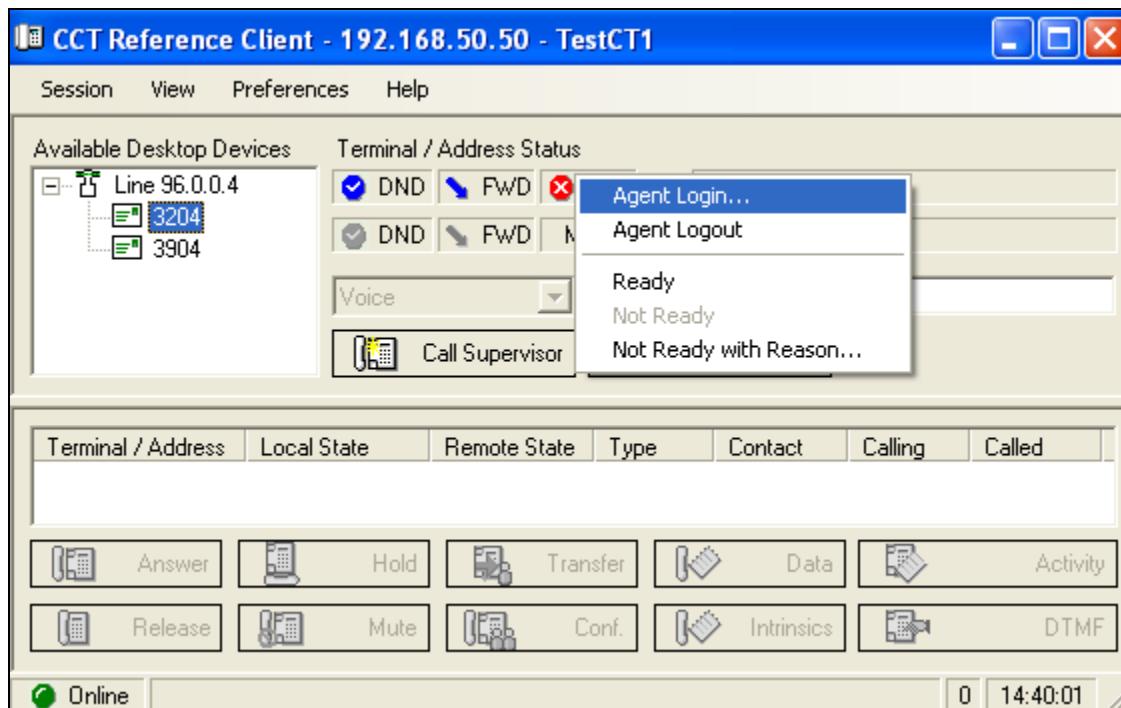

Select **Session → Connect As...**.

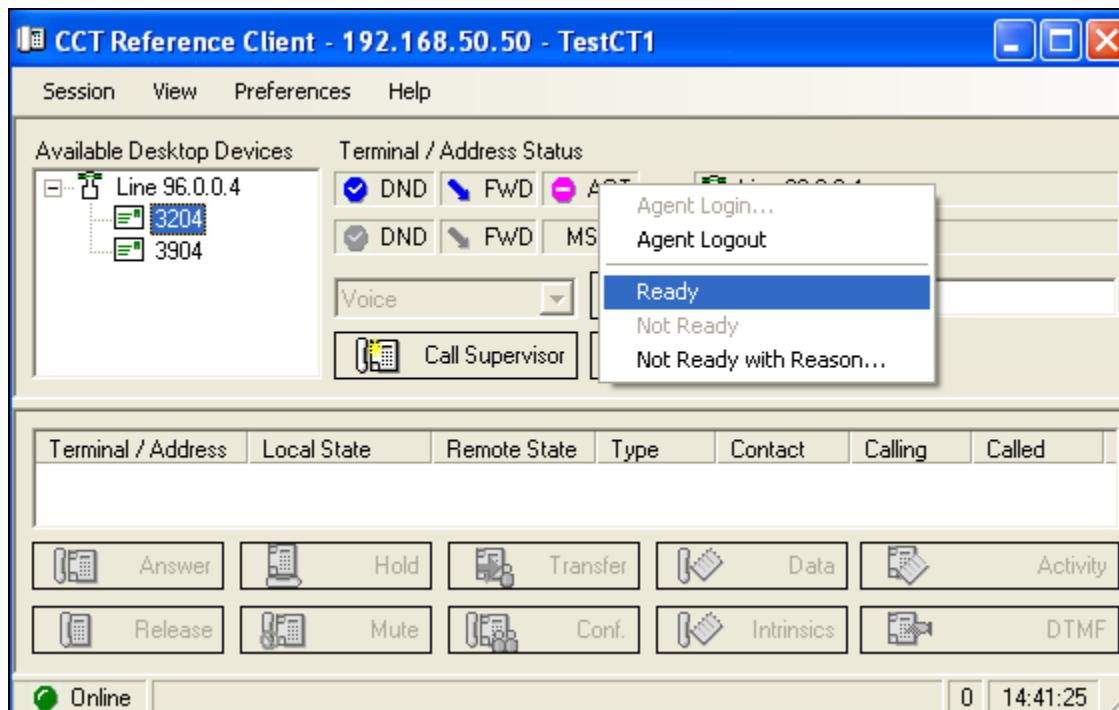

Enter the **UserID** and **Password** of a CCT user created in **Section 6.4** above.

Click on the AGT icon and select **Agent Login** as shown below.

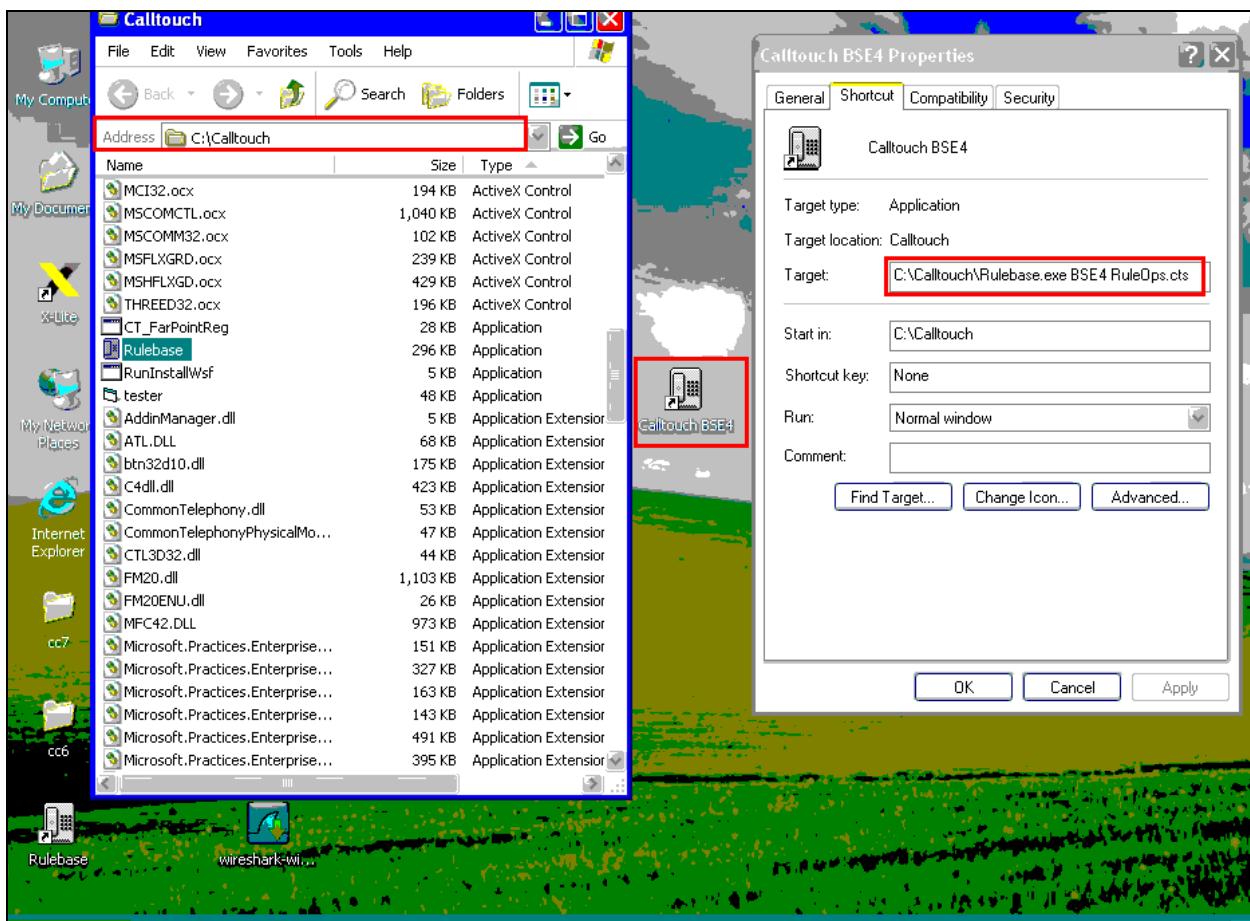

Once logged in correctly, the agent should be able to go **Ready** and Not Ready as shown here.

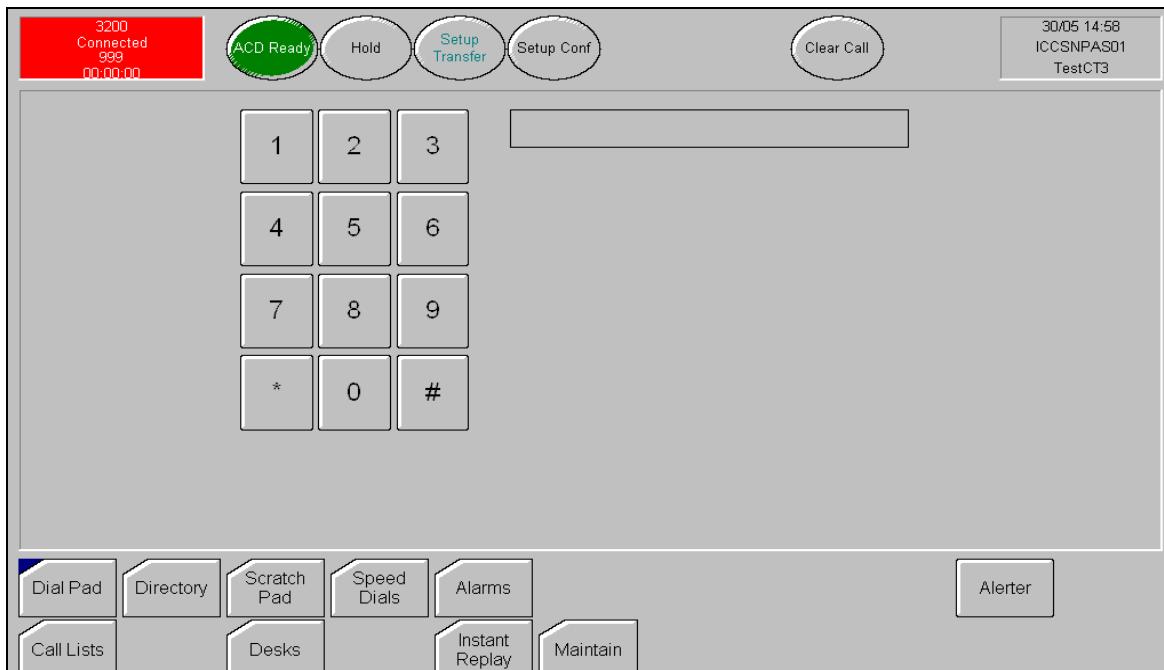

8.2. Verify that CallTouch has full CTI control

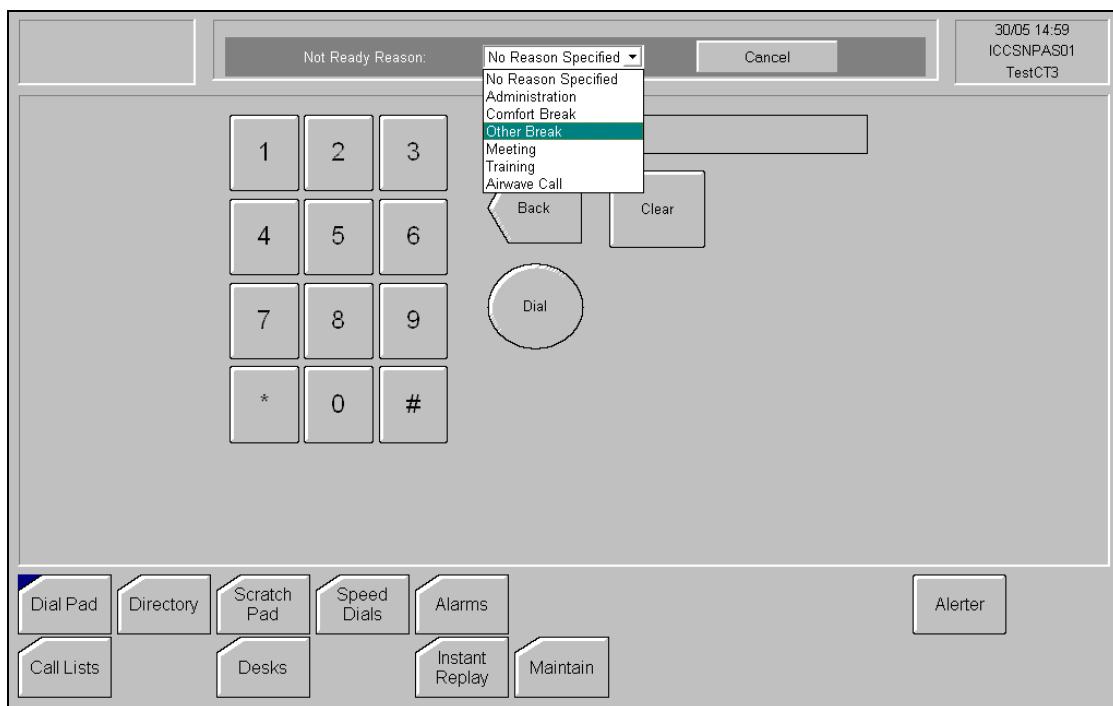

Log into CallTouch by double-clicking on the CallTouch Icon as shown below.

Once logged in, make a call to the emergency CDN number, this call should be able to be answered by the CallTouch application as shown.

The agent can be made to go “Not Ready” using the CallTouch application. A list of **Not Ready Reason** codes can be chosen as shown.

9. Conclusion

These Application Notes describe the configuration steps needed to ensure CallTouch from Northgate Public Services UK Limited can fully interoperate with Avaya Aura® Contact Centre R6.4 and Avaya Communication Server 1000 R7.6 by using Computer Telephony Integration (CTI) via a connection to the CCT module of the Contact Centre. Please refer to **Section 2.2** for test results and observations.

10. Additional References

This section references documentation relevant to these Application Notes. The Avaya product documentation is available at <http://support.avaya.com> where the following documents can be obtained.

Appendix D

Navigate to C:\Calltouch in order to open RuleOps.

This is an example of a file called RuleOps which contains information on the connection to the Avaya Aura® Contact Centre. Please note this is only shown as an example for further information regarding the setup of the CallTouch solution. Please contact Northgate as outlined in **Section 2.3** of these Application Notes
